

Iurii Izman

AI Engineer & Systems Architect | LLM/RAG | Workflow Automation | ERP/CRM Integrations

Tiraspol, Moldova - open to remote / hybrid Chisinau | iuriiizman@gmail.com | +373 686 25 316 | [LinkedIn](#) | [GitHub](#) | [Certifications](#)

PROFILE

AI Engineer & Systems Architect with 6+ years of experience turning complex ERP/CRM, data and business-process workflows into reliable software, integrations and AI-assisted automation. Strong at the intersection of LLM/RAG systems, workflow orchestration, API/webhook architecture, Python/n8n pipelines, PostgreSQL, Docker, TypeScript/JavaScript and Rust/Tauri desktop tooling. Able to own the full path from AS-IS discovery and TO-BE architecture to technical specifications, implementation logic, QA/acceptance criteria and production-oriented delivery.

IMPACT SNAPSHOT

6+ years: Systems architecture, ERP/CRM/API integrations and business-process automation

Public AI portfolio: 13 GitHub repositories; active LLM/RAG, STT, workflow automation and Tauri projects

25+ certifications: Bitrix24, 1C/ERP, 1C-Bitrix, BPMN/eEPC, systems and business analysis

Best-fit roles: AI Engineer, LLM/RAG Engineer, AI Automation Engineer, Systems/Integration Engineer

CORE SKILLS

AI / LLM Engineering	LLM orchestration, RAG, prompt engineering, AI assistants, structured outputs, AI evaluation logic, human-in-the-loop workflows
Backend & Automation	Python, n8n, REST APIs, webhooks, JSON contracts, async/batch workflow design, operational automation, CI/CD-like delivery flows
Frontend & Apps	TypeScript, JavaScript, React/Solid.js, Tauri, Rust, internal tools, dashboards, desktop applications, AI UX workflows
Data & Infrastructure	PostgreSQL, pgvector/vector-search concepts, Docker, Redis concepts, data normalization, monitoring, logging, audit trails
Systems & Analysis	BPMN, eEPC, AS-IS/TO-BE, requirements discovery, technical specifications, acceptance criteria, architecture documentation
Enterprise Platforms	Bitrix24, 1C/ERP workflows, CRM automation, telephony/CRM/database integrations, business-process optimization

SELECTED AI / AUTOMATION PROJECTS

- VoiceForge:** Local-first AI assistant for meetings: PipeWire capture, STT/diarization, RAG, LLM analysis, CLI + Tauri Knowledge Copilot. Python, Tauri/Rust, JavaScript.
- RoleForge:** Gmail-first AI job intelligence pipeline: deterministic parsing/scoring, Postgres audit trail, Gmail intake, Telegram digest/review queue. Python, PostgreSQL, Telegram API.
- AIPipeline:** AI-native delivery pipeline connecting Notion, GitHub, Cursor, n8n, Sentry and Telegram for structured AI-assisted delivery and operational control.
- Slova / ReplyLine:** Tauri/Rust/TypeScript desktop tools for transcription and live work-dialogue assistance: hotkey capture, STT, LLM response cards and local-first UX.

PROFESSIONAL EXPERIENCE

System Architect & Integration Engineer | AXELSOFT | Tiraspol

Apr 2023 - Present

- Design and implement event-driven integrations between ERP/1C, CRM systems, databases and dozens of external services using REST APIs, webhooks and structured JSON contracts.
- Translate business requirements into technical specifications, data contracts, backend tasks, acceptance criteria and implementation-ready integration logic.
- Build automation chains for sales/service funnels, triggers, routing rules, data normalization and operational workflows, reducing repetitive manual work across business processes.
- Model AS-IS/TO-BE processes in BPMN/eEPC and adapt IT architecture for scalable B2B client workflows.
- Prototype and document AI-assisted workflow patterns around LLM/RAG, n8n, Python pipelines and knowledge-driven automation.

Stack / domains: Python, TypeScript, Rust/Tauri, REST APIs, webhooks, JSON, n8n, PostgreSQL, Docker, Bitrix24, 1C/ERP, CRM, LLM/RAG, BPMN/eEPC.

System Analyst / Business Automation Consultant | RICHCODE | Chisinau

Mar 2020 - Mar 2023

- Audited client IT landscapes, gathered requirements and designed target architectures for CRM, telephony, database and business-process automation.
- Participated in full-cycle integration of software modules, connecting isolated systems into unified operational workflows and information flows.
- Designed logical data structures, standardized data handling processes and built transparent analytics for stakeholders and operators.
- Prepared product documentation: technical specifications, use cases, security regulations, operational guides and implementation handover materials.

Stack / domains: API integrations, CRM, Bitrix24, 1C-Bitrix, Docker, PostgreSQL, systems analysis, BPMN/eEPC, business automation.

CERTIFICATIONS & TRAINING

Selected certification areas: 25+ credentials across Bitrix24, 1C/ERP, 1C-Bitrix, CRM, automation, administration, development, analytics, BPMN/eEPC and system/business analysis.

- Business process architecture: BPMN Modeling and Optimization - advanced; eEPC Modeling and Optimization - advanced; System and Business Analyst - CORS Academy, 2024.
- 1C / ERP: 1C: Professional. Trade Management 8 (ed. 11.5) - professional level; 1C: System and Business Analyst - professional level.
- Bitrix24 CRM & automation: CRM; CRM Marketing; Cross-Analytics in CRM; Business Process Automation; Digital Workplace Automation; No-code Solutions; Tasks and Project Management.
- Bitrix24 administration: Administrator - basic level, business level and modules; boxed-version service administration; partner basic course.
- 1C-Bitrix / Bitrix Framework: Developer; Integration with 1C; Composite Site; Multi-site Architecture; Installation and Configuration; Hosting and Infrastructure; Content Manager.
- Development / integration: Vue.js and Bitrix Framework Integration; server-side / highload architecture; website promotion and marketing; online stores and CRM.

EDUCATION

Pridnestrovian State University named after T.G. Shevchenko | 2012

Engineer-Technical Institute - Computing Machines, Complexes, Systems and Networks

LANGUAGES

Russian: native | **English:** conversational / working proficiency | **Romanian:** intermediate
